## Welcome to the XXXIII Conference on Oilseed Crops,

There has been common research interest covered during Oilseed Crops Conferences organised by Plant Breeding and Acclimatisation Institute as well as “Challenges in Food Lipid Analysis” Conferences organised by the Institute of Food Technology (University of Life Sciences in Poznan). This has led the organisers to combine the two Conferences and bring together researchers in Genetics/Genomics, Biotechnology and Breeding, Lipid Technology and Applications in oilseed crops.

On behalf of the Organisers we cordially welcome you to the XXXIII Conference on Oilseed Crops 2016.

The oral presentations (30min), short communications (15min) and poster presentations will be presented within six topics:

- genetics and breeding,
- biotechnology and molecular biology,
- agronomy,
- pests and diseases,
- analytical methods and processing technology,
- biological value of oil and rapeseed meal.

Registration for the conference together with a title, form of presentation and the intended topic section should be sent via email to [postbox@nico.ihar.poznan.pl](mailto:postbox@nico.ihar.poznan.pl) or postal address. The Scientific Committee is eligible to change the form of the presentation.

Abstracts of presentations will be published in the Conference Book of Abstracts and European Federation for the Science and Technology of Lipids website. Please send the abstracts containing the title, names of the authors, affiliation, results and discussion on time. Abstracts should be sent in Word format to [mogrod@nico.ihar.poznan.pl](mailto:mogrod@nico.ihar.poznan.pl). The organisers will not make any language corrections of the content of the abstracts.

### Key dates:

**15.02.2016** - registration for the conference

**29.02.2016** - abstract submission

**25.03.2016** - 2<sup>nd</sup> circular including program will be sent to all conference participants
